

DECEMBER. XII Month.

Perfection on Perfection tow'ring high,
Glory on Glory rais'd, and Joy on Joy,
Each Pow'r improving in the bright'ning Mind,
To humble Virtues, lofty Knowledge join'd ;
Be this my highest Aim, howe'er I soar,
Before thy Footstool prostrate to adore,
My brightest Crown before thy Feet to lay,
My Pride to serve, my Glory to obey.

E N D.

D. J. 3 hrs. 30 m. 13 s. Scripture, "That the Works of God are all
1. 11 20 10 30 9 20" more in Number, Weight and Measure."
2. 12 14 6 10 9 21 It is certain, by Observations made with good
3. M. 14 5 54 9 22 Telescopes, that, though the Face of the
4. 1 7 7 38 10 23 Moon is covered with innumerable Inequali-
5. 2 6 8 21 11 24 ties like the Mountains upon the Earth, there
6. 3 0 9 4 12 15 is no great Collection of Waters upon it, like
7. 4 0 9 54 12 16 000 Oceans; nor is there any Reason, from
8. 5 0 10 45 1 27 her Appearance through those Instruments,
9. Moon 11 40 2 28 to suppose she has any such Appendix belong-
10. rises 12 36 3 29 to her as our Atmosphere of Air. If the
11. A. M. 36 3 30 Moon is inhabited (as the say for any Thing
12. 7 17 12 36 4 we know) those who live on one Side of He-
13. 5 20 2 30 5 2 misphere never can see our World, and those
14. 9 30 3 24 6 3 who live on the other can never lose Sight of
15. 10 50 4 23 7 4 It, except when the Earth comes between them
16. 11 53 5 21 8 3 and the Sun, as he keeps always one side
17. 12 55 6 2 9 6 turned towards us. Those who live about the
18. M. 55 6 53 9 7 middle Parts of the Hemisphere that looks to-
19. 1 59 7 4 10 8 wards the Earth, must see it always directly
20. 3 8 3 36 11 9 over their Heads with much the same Ap-
21. 4 12 9 28 12 20 pearance as the Moon makes to us, some-
22. 5 10 10 30 1 22 times horned, sometimes half, and some-
23. Moon 11 12 2 22 times wholly illuminated, but of a vastly great-
24. lets A. 4 3 13 7 Bulk than the Moon appears to us. It
25. A. 12 53 3 14 seems highly probable, that the Attraction of
26. 6 59 7 4 14 4 the Moon acting more strongly upon the Fluid
27. 7 58 2 27 5 16 than the solid Parts of our Terraqueous Globe
28. 8 53 3 13 6 17 is the Cause of our Tides, as they answer so
29. 9 52 1 55 6 18 exactly to her Motions and Distances from us,
30. 10 10 49 4 39 7 19 and other Circumstances. To enter upon that
31. 11 12 45 5 21 8 20 Theory, however, would be beside my pre-
sent Purpose. [Remainder in a next.]
